

File naming convention:

input data	dat
output from CFAST	lst (this is a lower case ell)
output from CPlot	out
reportss	ss
report	rs
all modules - history file	hi

Note: the conversion to CFAST 5 will involve the standard data files, plus project files

GLOBAL - includes time, ambient conditions

GEOMETRY - geometry and topology: FASTVUE geometry engine

FIRE - time history

VENTS - openings, trigger conditions, timing for vent opening

BOUNDARY - ceiling jet, single room

These are all text files
